MD. JAHIN HASAN

Software Developer — Web Development & Automation

Rangpur, Bangladesh · jahinhasan01@gmail.com · +880 1783-839992 · github.com/jahinhasan

CSE undergraduate at Bangladesh Army University of Science and Technology (BAUST), Rangpur. Builds web applications end to end and writes automation tooling for repetitive work, with working knowledge of backend systems, networking, and applied machine learning. Seeking internship opportunities.

EDUCATION

B.Sc. in Computer Science and Engineering
Bangladesh Army University of Science and Technology (BAUST), Rangpur — in progress

SELECTED PROJECTS

ShopSync — multi-vendor e-commerce marketplace
Shopping cart, multi-vendor order lifecycle, realtime buyer-seller chat over WebSockets, inventory audit trail, bKash/Nagad payment verification, loyalty points and vouchers.

SmartRoute Lab — network routing simulation
Seeded simulation with link failures; leakage-controlled ML experiment with published, honest results; CI with ruff and pytest on Python 3.12/3.14.

ARPS — payment recovery digital twin
Forecasting recovery risk with ML, and executing deterministic policy decisions behind a fresh-evidence safety gate on an append-only audit log.

Snake Agent — deep reinforcement learning
Trained against A* and graph-search baselines with a seeded benchmark CLI; trained model and history in-repo.

Web Scraper Tool & PDF Merger — desktop automation
Rate limiting, retries with backoff, and CSV/JSON/Excel export; local-first PDF merge/split/rotate/encrypt tool with a non-blocking UI.

Team Infinity — vision-guided competition rover
Firmware to an Arduino rover; ultrasonic obstacle-avoidance firmware as a hardware safety layer. 2nd Runner-Up, Line Follower Robot Competition, UIU CSE Fest 2025.

SKILLS

Languages: Python, TypeScript, JavaScript, PHP, Dart, SQL, C++ (Arduino)
Web: React, Laravel, FastAPI, Tailwind CSS, Three.js, WebSockets, REST APIs
Data: MySQL, PostgreSQL, SQLite, SQLAlchemy/Alembic, Cloud Firestore, pandas
AI/ML: PyTorch, scikit-learn, XGBoost, YOLOv5 + OpenCV, evaluation methodology
Tooling: Git/GitHub, GitHub Actions CI, Docker, pytest/Pest/Vitest, Linux, Nginx/Caddy
