MD. JAHIN HASAN

Web Development & Python Automation | Internship / Junior Roles

Rangpur, Bangladesh | +8801783839992 | jahinhasan01@gmail.com

github.com/jahinhasan

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate building web applications, database-backed systems, and Python automation tools. Experience developing academic and independent projects spanning e-commerce, web scraping, productivity software, and operational workflows. Seeking a web development or automation internship / junior opportunity to contribute to practical software products.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL, HTML, CSS, C, C++, Java

Web Development: Laravel, React, Vite, Bootstrap, Tailwind CSS, Blade templates

Databases & Tools: MySQL / MariaDB, Git, GitHub, Linux, Bash, VS Code, npm, Composer

Focus Areas: Web applications, CRUD workflows, database design, scripting, web scraping, debugging, version control

SELECTED PROJECTS

ShopSync — Smart Retail Management & Online Shopping System | Developed a multi-vendor marketplace with product search, cart and checkout, shop-owner dashboards, order and inventory management, admin moderation, and loyalty rewards.

github.com/jahinhasan/shopsync-a-web-development-project

Web Scraper Tool | Built a Python desktop scraper with configurable CSS selectors, paginated extraction, background workers, live data preview, and CSV / JSON / Excel export.

github.com/jahinhasan/web-scraper-tool

PDF Merger Tool | Created a utility to combine multiple PDF files into one document, simplifying repetitive file handling.

github.com/jahinhasan/pdf-merger-tool

Focus App / RPG — The Student Life | Built student-focused tools for task planning, focus tracking, and progress monitoring, with gamified elements to encourage consistent study habits.

github.com/jahinhasan/Focus-app | github.com/jahinhasan/RPG-the-student-life

Hotel Management System | Implemented database-backed room and booking workflows, contributing to backend logic and MySQL schema design.

github.com/jahinhasan/Hotel_Management_system

Payment Recovery Digital Twin | Developed a prototype using synthetic payment data, XGBoost risk scoring, and a FastAPI state machine to simulate recovery workflows with audit logs.

github.com/jahinhasan/payment-recovery-digital-twin

ACADEMIC & TEAM EXPERIENCE

Academic Software & Robotics Projects | Bangladesh Army University of Science and Technology

Collaborated on small-team projects involving frontend interfaces, backend logic, database integration, testing, debugging, and system integration.

EDUCATION

B.Sc. in Computer Science and Engineering | Bangladesh Army University of Science and Technology, Rangpur | 2024–2028 (Expected)

Current standing: 3rd Year, 6th Semester | CGPA: 3.50

CERTIFICATIONS & ACHIEVEMENT

Learn Git and GitHub (2024); Complete Python Programming (2024); Mobile App Development (2025) — Tutorial Point

2nd Runner-Up — Line Follower Robot Competition, UIU CSE Fest 2025
